✓ Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. *You can also type a keyword to* search online for the video that best fits your document. To make your document look *professionally* produced, Word provides **header, footer, cover page, and text box designs** that complement each other. For example, you can add a matching cover page, header, and sidebar.

- a. Click Insert and then choose the elements you want from the different galleries. Themes and styles also help keep your document coordinated. When you click Design and choose a new *Theme, the pictures, charts, and SmartArt graphics change to match your new theme.* When you apply styles, your headings **change to match the new theme.** Save time in Word with new buttons that show up where you need them.

To change the way a picture fits in your document, **click it and a button** for layout options appears next to it. **When you work on a table**, click where you want to add a row or a column, and then click the plus sign. **READING IS EASIER, TOO**, in the new *Reading view*. You can **collapse parts of the document** *and focus on the text you want.* If you need to stop reading before you reach the end, Word remembers where you left off - even on another device.
